Office Action Summary

Art Unit: 3736

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification and claims add new matter which was not supported by the original disclosure, specifically any recitation of reducing colonic transit time to regulate the excretory function and reducing gastrointestinal transit time to regulate the bowel function.

3. The above rejection was made because it is unclear whether the application was intended to be a continuation, original or a continuation-in-part of 08/889,767. The beginning of the specification recites that it is a continuation-in-part, however the declaration, claim for small entity status and new application transmittal sheet make no reference to any parent application and list this application as an original and not a c-I-p.

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 3736

5. Claims 13-21 are provisionally rejected under 35 U.S.C. 101 as claiming the same *6,306,078* invention as that of claims 1-3,6,11-12,14-15 of copending Application No. 08/889,767. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
